YOUR DOOR. YOUR DESIGN. YOUR COMFORT.

The choice of your front door is always an important decision, where many different factors are included: Durability, safety, energy efficiency and design. Weru offers you two high-quality plastic front door systems for this purpose: TERSA and AVIDA. Highly impact resistant, colour, light and weather resistant, both systems are the optimal choice when it comes to consistency works. TERSA is also suitable for buildings that demand the highest standards of thermal insulation and modern design. To make your decision making easier, you can configure our TERSA and AVIDA plastic entrance doors individually and adapt them to your needs. In addition, you can also take advantage of our proven colour packages, handles, anti-burglary protection and comfort, with which you can equip your front door according to your taste. No matter which front door system you ultimately decide on: With Weru, the highest quality will move in with you. And with it the good feeling that you have made the right decision.

Six steps to the door of your life

You like to arrange your life individually: You equip your car with a sports package and choose the Internet flat rate with your mobile phone contract. With Weru you can also easily adapt your front door to your needs. From the frame and colour design to the handle and safety and comfort equipment, you can specify everything to your taste in six steps. In addition, in steps 3-6, you can choose from various equipment packages. This will take you to your dream door, which will give you a lifetime of pleasure.

1

CHOOSE YOUR DESIRED DOOR

In principle, it is possible to describe houses as more modern or more classic. The doors in the catalogue are also sorted to match.

Let us inspire you and simply decide according to your taste - because the high Weru quality is a guarantee for you guaranteed for every model.

Modern Designs
reduced,
linear forms
with filigree
Structures

Classic Designs
traditional,
timeless forms
with decorative
Styлееlements

The right door in style: You will find our models from page 8 onwards

2

GIVE YOUR DOOR A PROFILE

You decide how much profile your door should have. Whether glass rebate panels for a classic

Design with offset optics or one-sided wing-covering for a modern look - Weru gives you the choice.

Glass rebate filling:
Offset
Optics between
Plastic profile
and door panel

One-sided wing over covering:
Rimitate and
accumulatefilling
a harmo
niche unit

Quality in every detail: More about fillings and frames can be found from page 39 onwards

3

BRING COLOUR INTO PLAY

You want to be creative? Sure! Simply use the three-level colour package, symbolized by the first column of the logo. With the variety of noble foil lamination colours in wood and structure optics as well as hundreds of RAL colours, you can make your door an eye-catcher.

Colour-Paket: Wählen Sie Ihre Wunschfarbe in drei Stufen

Show your colours: Our colour options can be found from page 48 onwards

4

TERSА/АVІDА

GRAB THE HANDLE

The visual effect of your door is not only determined by the colour, but also by the handle. Whether short or long handle, wood or metal, flat or round: the three package levels, expressed by the second logo column, make it easy for you to choose and access.

Handle package: Select your desired handle from three package levels

Go for it: You will find our handle options starting on page 52

5

TERSА

MAKE YOUR DOOR EVEN SAFER

Your Weru door protects what is dear to you. Even the standard equipment helps to prevent burglaries. With the Protect Package, symbolized by the third column of the logo, you can further increase security in three stages.

ProtectPaket: Increase security in three stages

Prove that you have a sure instinct: You will find our Protect options on page 56

6

TERSА

INCREASE YOUR COMFORT

All TERSA doors are already equipped with Weru-AutoLock - that means the door locks automatically when closed. In addition, you can further increase the comfort in three selectable package levels. This is represented by the fourth logo column

ComfortPaket: Increase the comfort in three steps up to opening your front door by fingerprint

Make yourself comfortable: you will find our comfort options starting on page 58

Hint:

All Weru front doors are also available with matching side panel in various design variants

TERSA/AVIDA plastic entrance doors

Modern door designs

Design that you can get involved with: Inlays stand out without being thick. Because the metal strips are embedded in the door surface at Weru. This way they form a unit with the inlay, which makes cleaning easier. Combined with a dark colouring, the inlays look particularly attractive due to the play of light on the surfaces.

Modern door designs

Always at your side: In the case of wider house entrances, you can add side panels to one or both sides of the door to create a beautiful finish. As with your Weru front door, you also have Side panel plenty of design freedom. In addition to the glass art that we have already coordinated with the door design, you can choose from a variety of ornamental glass and clear glass. In this way, you determine not only the visual appearance but also how much privacy protection you prefer. For a complete house entrance from a single mould.

Invitation to access: The handle is the touch point of your door. It must therefore offer high functional quality above all. Be easy to grip. Be durable. But the handle also makes a significant contribution to the appearance of the front door. Length and shape play a role here. To ensure that you find exactly the handle that convinces both hands and eyes, Weru offers you a choice of various models. The necessary inspiration and the right handle for your front door can be found on page 44 and from page 52 onwards.

The material design dreams are made of: Carbon is extremely light with very high strength and almost any shape. This ensures framing it's not just in race cars for attention. Also as high-quality of the glass cutout of your front door, the carbon look quickly attracts visitors to the spell. No matter what colour you choose for your door and what kind of glass art you choose - your Weru front door is sure to be a hit.

Modern door designs

The perfect swing for your home: In addition to the wide range of popular classic and geometric shapes Weru has to offer, our arched designs also captivate with their visual appeal. With a selection of different round curved light cut-outs you can choose a soft door shape. This ensures a fantastic incidence of light not only in the interior. It is also a rarely encountered eye-catcher from the outside and makes your door picture a round thing.

A photograph of a modern house entrance. The upper part of the house has horizontal wood siding. Below it is a white concrete wall with a dark-framed door and a large glass panel. The door has three horizontal glass inserts. To the left of the door is the number '32'. To the right is a potted plant. Three concrete steps lead up to the door. The sky is reflected in the glass panel of the door and the window above it.

weru. exactly my door.

Design and Technology

32

The door according to your house style

The door determines the face of a house. It is therefore crucial that the door fits harmoniously into the overall picture. At Weru, you can optimally match the design of your front door to your house style thanks to the different panel designs. On this page you can learn the available design options. And give your door exactly the profile you want.

FILLING VARIANTS

How much profile do you want your door to have? At Weru you determine how your door looks from the outside and inside.

Outside

Inside

glazing rebate filling (G)

Classic design due to the offset appearance between plastic profile and door panel.

Outdoor

Inside

One-sided sash-covering (E) Frame and door panel form a single unit on the

Outside a harmonious unit. Thus the modern design is impressively shown to advantage. The inside is designed as a glass rebate filling.

One-sided sash-covering design only possible with system TERSA.

Front door systems TERSA and AVIDA

Discover the hidden values of your door

Whether TERSA or AVIDA: No matter which door system you choose, every Weru entrance door is unique. The doors, individually manufactured for you by master craftsmen, impress with features such as more security, stability and energy efficiency.

TERSA

Abb. Einseitig flügelüberdeckend

Profile system

- 6-chamber profile, construction depth 86 mm - for highest thermal insulation values
- PVC frame with aluminium reinforcement - for high rigidity and tear-out resistance secure fastening of the locking parts and hinges.
- Front door leaf made of GRP with steel reinforcement - for maximum stability,

Rigidity and durable function of the front door

Threshold

Stable, continuous threshold with thermal break - for freedom from condensation and high air and driving rain tightness

Seals

Replaceable EPDM seals with high resilience - for high and durable air and driving rain tightness

Filling

- glazing rebate filling, basic depth 37 mm, $UP = 0.77 \text{ W/(m}^2\text{K)}$
- Leaf concealing on one side, basic depth 57 mm, $UP = 0.52 \text{ W/(m}^2\text{K)}$

Insulating glass

- 2-pane thermal insulation safety glazing $U_g = 1.1 \text{ W/(m}^2\text{K)}$ with 6 mm laminated safety glass
- 3-pane* thermal insulation safety glazing $U_g = 0.6 \text{ W/(m}^2\text{K)}$ with 6 mm laminated safety glass

Highest energy efficiency values

- glazing rebate fillings up to $U_d = 0.91 \text{ W/(m}^2\text{K)}$
- One-sided sash-covering fillings up to $U_d = 0.76 \text{ W/(m}^2\text{K)}$

Lock system

Automatically locking AutoLock lock as standard secures the door with two latchbolts when the door leaf is simply closed, thus providing effective protection against break-in attempts

Tapes

Three sturdy 2-part roller screw-on hinges protect the door against levering open and ensure permanent function

Profile cylinder

Profile cylinder with emergency and danger function

Available up to the tested safety class RC 2

* Standard bei einseitig flügelüberdeckenden Türen.

AVIDA

Abb. Glasfalzfüllung

Profile system

- 5-chamber profile, basic depth 70 mm - for high thermal insulation values
- PVC frame with steel reinforcement - for high stability and safe fastening to masonry
- PVC front door leaf with steel reinforcement - for high stability and permanent function of the front door

Threshold

Stable, continuous threshold with thermal break - for freedom from condensation and high air and driving rain tightness

Seals

Replaceable EPDM seals with high resilience - for high and durable air and driving rain tightness

Filling

glazing rebate filling, basic depth 37 mm, $UP = 0.77 \text{ W/(m}^2\text{K)}$

Insulating glass

2-pane heat insulation safety glazing $U_g = 1.1 \text{ W/(m}^2\text{K)}$ with 6 mm laminated safety glass

High energy efficiency values glazing rebate fillings up to $U_d = 0.99 \text{ W/(m}^2\text{K)}$

Lock system

3-bolt lock secures the door by locking it with two solid bolts and thus protects effectively against break-in attempts

Tapes

Three sturdy 2-part screw-on hinges protect the door against levering open and ensure permanent function

standard equipment

What TERSA and AVIDA plastic entrance doors offer you as standard

Even in their standard version, Weru's TERSA and AVIDA plastic entrance doors offer numerous advantages that make your life more comfortable and safer. Our TERSA front doors are already equipped with the mechanically self-locking

Automatic lock Weru-AutoLock equipped. In AVIDA front doors, for example, the lock in the door leaf is equipped with three solid bolts made of hardened steel. It is almost impossible to saw off or bend the bolts.

packages

Turn a door into your very own door

Turn a door into your dream door: Every model at Weru can be adapted to your living requirements in as much detail as you like, beyond the standard equipment. For an additional charge, four equipment packages (Colour, Handle, Protect and Comfort) are available, each with three levels (+, ++ and +++). Symbolised by the four colours of the Cube. For more detailed information please contact your Weru dealer. He will personally assist you in making your Weru door something very special. Or visit our website at www.weru.de for more information.

Colour package Handle package Protect package Comfort package

TERSA/AVIDA

Along with the panel design, the colour scheme is the decisive element for the visual impression of your front door. TERSA and AVIDA front doors are manufactured in white, similar to RAL 9016, as standard. With the three colour packages you can customise your plastic entrance door according to your individual requirements.

Match your personal taste to the house facade. The Colour Package + 22 and ++ 20 provides you with foil laminations in wood structure and plain colours, which in addition to the colouring also have a special surface feel. With the Colour-Package +++ you have the choice of 200 colours from the RAL-Classic colour palette to design the outside of your front door.

- Colour: Large selection of 200 colours from the RAL-Classic colour palette
- Surface: Foil lamination in wood and plain with special surface haptics

Colour +

Outside: Foil laminated
inside: White

Colour ++

Interior: White

SINGLE-SIDED FILM LAMINATION COLOURS* IN THE COLOUR PACKAGE +

Make your plastic door something very special. With these expressive colours in wood and structured optics.

* Kaschierfarben sind nur für ausgewählte Modelle erhältlich (siehe Modellkennzeichnung).

** Gekennzeichnete Farben sind nicht für Füllungstüren erhältlich.

*** Nur für TERSA.

TERSA/AVIDA

DOUBLE-SIDED FILM LAMINATION COLOURS* IN THE COLOUR PACKAGE ++

Make your plastic door something very special. With these expressive colours in wood and structured optics.

* Kaschierfarben sind nur für ausgewählte Modelle erhältlich (siehe Modellkennzeichnung).

ONE-SIDED RAL-COLOURS IN THE PACKAGE COLOUR +++

For the RAL colours, there are about 200 RAL colours available from the RAL Classic colour fan. The RAL colours are finished with a gloss level of 30 units.

Grasping and understanding have always been elementary components of human life. With the choice of the handle you create the access to your domestic life not only optically but also haptically inviting for yourself and your guests. The handle package provides you with a diverse selection of exterior handles in three stages. You can choose between short handles, long handles and handles with a special feel. You will find the matching external roses and the range of internal handles on page 55.

- Shape: Short handles, long handles or handles with special haptics Function:
- Simple operation and high quality Design: Match your door handle
- exactly to your door design

handle +

Selection of rather shorter handles

Seamless integration into the classic or modern door design

handle ++

Selection of long and short handles

Additional design accents and simple operation by large and small

Protect The package for more security

TERSA

A secure door that offers sufficient protection creates trust. With the Protect package you strengthen the resistance of your TERSA front door against burglaries in three stages (+, ++ and +++), prevent easy levering open and allow locking already during normal closing. So you are always on the safe side with your TERSA front door.

- Resistance: Increase the burglar resistance of your front door
- Protection: Prevent the door from being levered open
- Safety: Lock the door during normal closing

INCREASE OF THE SAFETY CLASS (RC = RESISTANCE CLASS)

RC 1: Components have basic protection against attempts to break in with physical force such as kicking, Counter-jumping, shoulder throwing, pushing up and pulling out (mainly vandalism). RC 2: The occasional offender tries to get rid of the victim with simple tools like screwdrivers, pliers and wedges to break open the closed and locked component.

THE INDIVIDUAL PROTECT COMPONENTS AT A GLANCE

AutoLock Plus - mechanically self-locking automatic lock with three latchbolts -
Part of the packages Protect +, Protect ++ and Protect +++

- Three latchbolts secure the door completely after simply closing the door

automatic and very effective against burglary attempts

- With AutoLock you achieve high security without locking the door to
must

anti-lift-out devices -

Part of the Protect +, Protect ++ and Protect +++ packages Closing wedges
and drill-in pins specially attached to the frame and sash rebate interlock when
the door is closed and thus prevent

forcible lifting of the door leaf in the area of the hinges

Security escutcheon -

Part of the package Protect +

The security escutcheon protects the profile cylinder against attacks such as drilling
or core pulling and prevents the escutcheon from being lifted off or unscrewed

Janus security cylinder -

Part of the packages Protect ++ and Protect +++

- The multi-pin reversible key profile cylinder with steel-hardened

Safety pins meet highest safety requirements

- Janus profile cylinders have a locking mechanism, i.e. the lock
exists only once

- Integrated core protection disk prevents easy drilling

P4A anti-bullet glazing -

Part of the package Protect +++

Laminated safety glass with safety film between the panes - makes it
more difficult to break the glass in the front door by force

- Contributes to compliance with safety class RC 2

Comfort The package for easy opening and closing

Do you dream of not having to travel long distances to the front door when the doorbell rings? Or the obligatory rummaging for the key would finally be history? Then make yourself comfortable with the Comfort Package as you wish. In three levels (+, ++ and +++) you can increase the comfort of your door. From opening at the touch of a button to opening your door at the touch of a finger.

- More convenient: Open your door simply by pressing a button
- More secure: The self-locking lock with electric door opener
- More individual: Use your fingerprint as a key

Lock Extras

For even safer and more convenient doors

From the special material construction and stable hinges to the high-quality lock system: all security-relevant elements are optimally integrated in TERSA and AVIDA entrance doors, coordinated with each other. With additional safety and comfort features and additional accessories you can give your dream door the finishing touch.

Weru-TwinLock

With the Weru-TwinLock door catching device you first open the door just a gap wide to look out. No one can enter until you unlock it from the inside. To get into the house, unlock the TwinLock from the outside with a key. A

Additional security aspect: All lock parts are concealed in the door profiles.

Keyed alike profile cylinders

With a keyed profile cylinder you only need one key for your house and cellar door.

Weru's keyed alike profile cylinders offer high comfort and security. They meet the highest quality standards and are equipped with sophisticated quality features.

AutoLock - mechanically self-locking multi-bolt lock

After simply closing the door, two latchbolts automatically and very effectively secure the door against break-in attempts. With AutoLock you achieve high security without having to lock the door.

Electric door opener

More security and comfort all in one: You can use the intercom system to find out who is at the door first. With the electric door opener you can then open the door for your guests conveniently at the touch of a button - without having to walk far. The extra comfort especially in multi-storey houses or for people with limited mobility.

Door closers

Who hasn't? For example, you have a lot to carry after shopping - and have to put everything down again or strain yourself to close the door. The Weru door closing unit, which closes the door completely automatically, provides more comfort. You can choose between the slide rail or flat form versions. By means of a precisely adjustable force the door falls gently but safely - upon the necessary pressure - into the lock.

Digital door viewer

Good to know who's at the door: The digital door viewer uses a camera to record what is happening outside and shows you what is happening inside on a picture screen. In a convenient size and without any distortion.

Fingerscan with Bluetooth

optionally available at Comfort +++ available

Open the front door with a finger or app? Fingerscan with Bluetooth makes it possible. Using the app from ekey home, you can define and control who is authorised to enter. With just a few clicks you can add new people or delete existing ones. If required, your smartphone becomes a remote control - so you can open your front door even from a distance.

And in case your smartphone is stolen, the thief is denied access to your home. This is because the ekey home app is secured by a four- or six-digit code. The app is available for Android and iOS devices.

Fingerscan in handle

optionally available at Comfort +++, only for the TERSA front door

With its elegant stainless steel finger guide, the fingerscan, which can also be operated via Bluetooth, is integrated flush into the front door handle. The integrated fingerscan in the handle does not interrupt the attractive design of the wing-covering panel.

The most beautiful privacy screen

Patterned glass with attractive structure

A TERSA or AVIDA door with glass elements invites the light to you. And offers you all the freedom you need to create your own personal lighting mood. With modern or traditional ornaments in the glass, you can create an unmistakable design. And at the same time protect the interior from prying eyes. The structured surface of the ornamental glass is located in the space between the panes and allows sufficient light to pass through. The outside of the glass is smooth and easy to clean.
